

Fredslys flamme / Peace Candle Flame

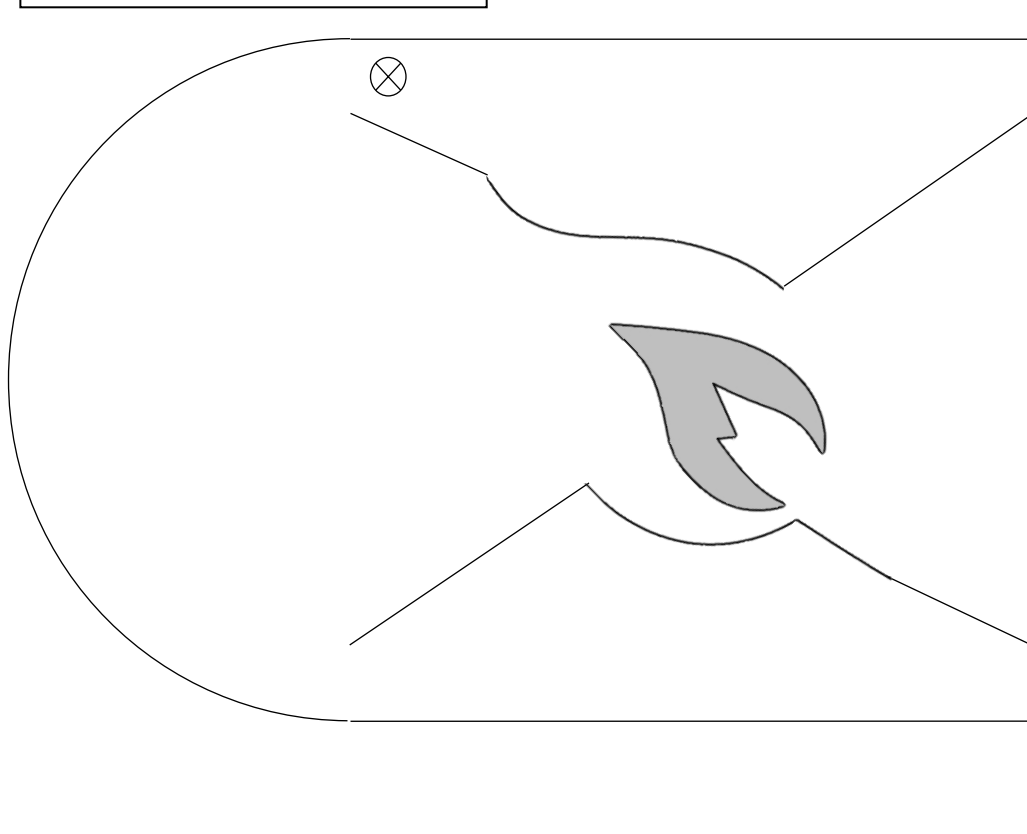

Skabelonen printes ud på to forskellige farver papir og arkene bukkes langs den stiplede linje, hjertet skæres derefter ud efter markeringerne. Det gråt markerede skærs helt ud. Efterfølgende bukkes hjerterne den modsatte vej så printsiden kommer indad. De to dele placeres således at de to krydser ligger oven på hinanden og så cirklen med krydset ikke er synligt inde i hjertet (det er vigtigt at få startet rigtigt pga. farven på figuren).

The template is printed out on two different colors of paper and the sheets are bent along the dotted line. The heart is then cut according to the markings. The gray marked area is cut out completely. Subsequently, the hearts are bent the opposite way so that the print side comes inwards.

The two parts are placed so that the two crosses lie on top of each other and so that the circle with the cross is not visible inside the heart (it is important to get the start right because of the color of the figure).

Farve ark (Figuren), det gule /
Color sheet (The figure), the yellow

God fornøjelse / Enjoy

Fredslys flamme / Peace Candle Flame variation

klip et stykke papir i en tredje farve og flet ind i hjertet på indersiden, så der kommer en ekstra farve i flammen. Fikser stykket med lidt lim. Her er midten af flammen blevet gul i stedet for hvid.

Cut out a piece of paper in a third color and weave into the heart on the inside so that an extra color comes into the flame. Fix the piece with a little glue. Here the center of the flame has become yellow instead of white.

Fredsllys 2 / Peace Candle Flame 2

Skabelonen printes ud på tre forskellige farver papir og arkene bukkes langs den stiplede linje, hjertet skæres derefter ud efter markeringerne. De gråt markerede områder skæres væk (god ide at begynde med det). Efterfølgende bukkes hjerterne den modsatte vej så printsiden kommer indad. De to dele placeres således at de to krydser ligger oven på hinanden og så cirklen med krydset ikke er synligt inde i hjertet (det er vigtigt at få startet rigtigt pga. farven på figuren).

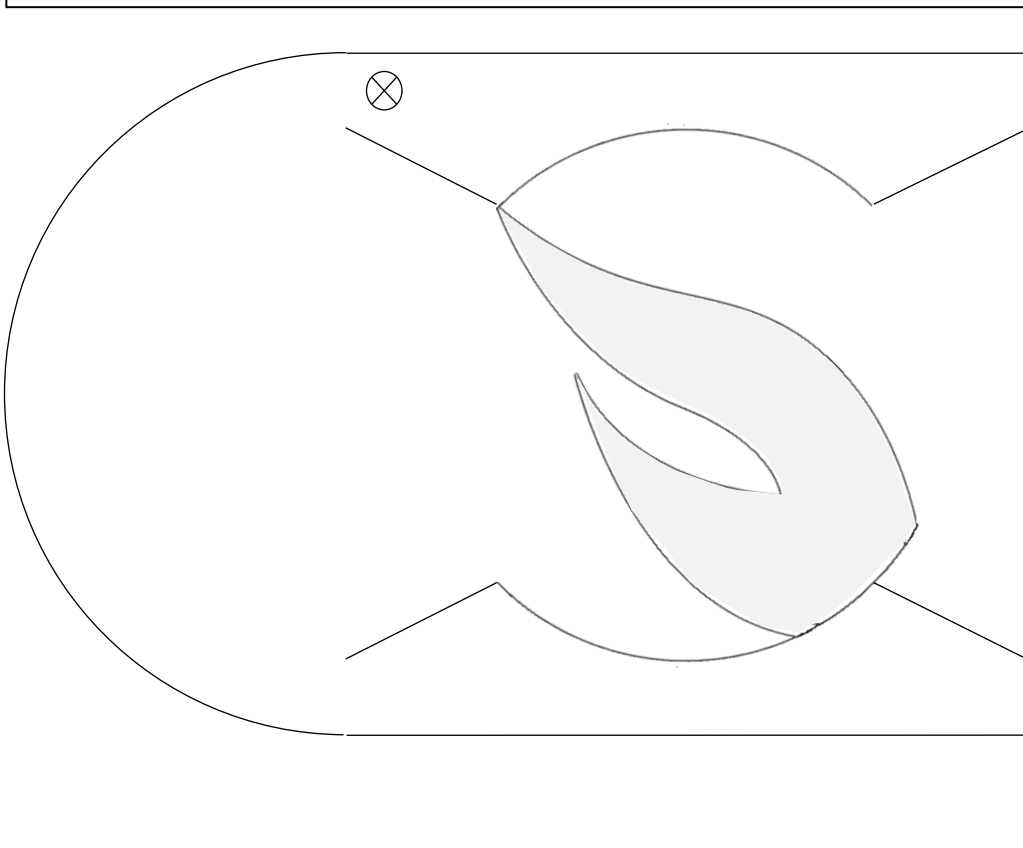

The template is printed out on three different colors of paper and the sheets are bent along the dotted line. The heart is then cut according to the markings. The gray marked area is cut out completely. Subsequently, the hearts are bent the opposite way so that the print side comes inwards. The two parts are placed so that the two crosses lie on top of each other and so that the circle with the cross is not visible inside the heart (it is important to get the start right because of the color of the circle).

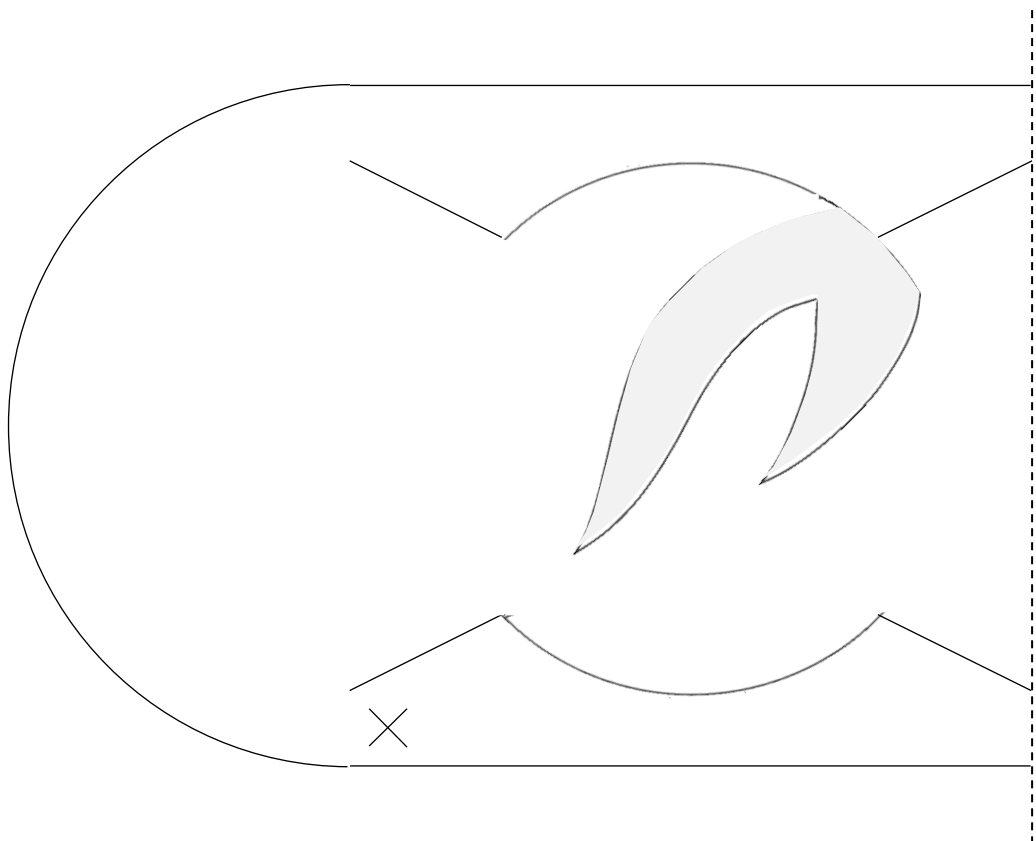

Cirkelns farve, denne udskæring giver 2 halvdele! / The circle color sheet, this cutting gives two parts!

Den nederste skubbes/flettes ind til sidst og fikses med lim. The lower part is pushed/braided in at the lower side and fixed with glue.

God fornøjelse / Enjoy

Inder farve (flammens inderste farve), skæres lidt mindre end tegnet. Lægges inde i hjertet i samme retning som den orange (cirkelfarven) og limes fast.

Inner color (the inner color of the flame), cut slightly smaller than the drawing shows. Place inside the heart in the same direction as the orange (circle color) and glue.
